SUMMARY

Computer Science graduate from Tarumanagara University with experience in web and mobile application development. Worked as a Full-Stack Developer at BSSN, building an end-to-end IT Security Assessment platform including vulnerability management, ticketing, and reporting systems. Also developed mobile applications with geolocation tracking, face recognition, and internal portal systems for organizational use.

WORK & PROJECT EXPERIENCE

Full Stack Developer, Badan Siber dan Sandi Negara (BSSN) **Nov 2025 - Present**

- Built an end-to-end IT Security Assessment platform — managing PSE, asset inventory, and scheduling.
- Developed a vulnerability management & ticketing system for tracking findings, severity classification, and remediation.
- Implemented centralized reporting, multi-user collaboration with RBAC, and real-time notifications.

Company Profile Website - Star Ayres Indonesia **Sep 2025 – Okt 2025**

- Developed a responsive company profile website for corporate branding and information delivery.
- Implemented modern UI/UX design and ensured cross-browser & cross-device compatibility.
- Optimized performance and deployment for production environment.

Mobile Developer, The House of Representatives Republic of Indonesia (DPR RI) **Feb 2024 - Jun 2024**

- Create an app with geolocation-based attendance tracking and face recognition.
- Develop an application serving as a portal. Display relevant information such as agendas, profiles, dashboards, news, and announcements.
